

Corrections Corrosion Resistant Gate Door

For Showers and Lavatories

A safer, more cost effective alternative to curtains in corrections and other institutional facilities.

Corrections Corrosion Resistant Gate Door

For Showers and Lavatories

Are you spending a significant amount of time and money on the aggravation of repairing or replacing expensive shower doors and shower curtains in your jail, prison, or other institutional facilities?

If you answered "yes" then Chase Doors has a durable and economical solution for you, the Chase Gate Door!

The Chase SRP Gate Door is lightweight, yet extremely strong, durable and virtually indestructible. The panel is constructed of 1/2" thick, solid HDPE (high-density polyethylene). The textured door has the color throughout the panel which hides dents and scratches. The full length anodized aluminum backspine contains the in-line cam, coil spring, gravity assist hinge system which centers the door back to the closed position with maximum allowable deflection 1/4" per 36", meeting industry standards for HDPE material. The backspine is rivited to the door panel and includes upper and lower stainless steel hinges. Practically maintenance free, the Gate Door is resistant to the traditional mold and mildew that plagues shower curtains.

- All Chase Gate Doors are custom built to your exact opening size.
- Different materials can be used to construct the Gate Door to meet your specific requirements, such as stainless steel or other durable plastics.

In August 2004 Curran-Fromhold Riverside Correctional Facility in Philadelphia purchased a Chase SRP Gate Door to replace an expensive stainless steel shower door. Today they have 262 Chase Gate Doors installed in their facility.

Chase Doors
10021 Commerce Park Drive
Cincinnati, OH 45246

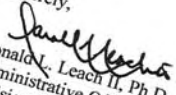

Dear Mr. Fromholt:

One of the major issues that we have been facing within our inmate pods is the upkeep of shower curtains. Maintaining a sanitary environment was a challenge due to the growth of mold and mildew on the curtains. The situation is made even worse realizing the potential for passage of contagious diseases like MRSA on the curtains. Then there is the issue of functionality. Inmates would devise ways to help the shower curtains more fully cover the opening, and in the process destroy them and cause damage to the physical plant. We needed a solution that was effective and affordable.

While attending the ACA conference last summer I came across your company. While Chase Doors manufactures double-acting impact traffic doors for a magnitude of applications, your display of a shower gate door immediately interested me. The door was constructed with a tremendously strong polyethylene panel and stainless steel hinges and hardware. A sample of the material was offered to take with me back to my facility. After vigorous testing and multiple attempts (with a sledgehammer!) to destroy the material, it was still intact, marginally scratched! We were utterly amazed!

Chase offered me the opportunity to test the shower gate door in one of our pods. After three months it looks as good and functions as well as the day we installed it! I am now making arrangements to retrofit our entire facility with the doors. Chase's shower gate door has taken the hassle out of something we'd prefer not to have to deal with on a regular basis. It also eliminated the eye sore that the old shower curtains presented. I would highly recommend this product to anyone seeking an ultimate solution to shower enclosures that is efficient and cost effective.

Sincerely,

Donald L. Leach II, Ph.D.

Self-closing, self centering, anodized aluminum backspine with upper and lower stainless steel hinges. Stops and bumpers can be used to limit the swing pattern.

Shower curtains are easy to pull down and attract mold and mildew which is difficult to clean and unsanitary.

Benefits

The Chase Gate Door provides the peace of mind of a long term solution...

- Offers the inmate a sense of privacy while allowing the Guard the opportunity to monitor the activities above and below the door.
- Easy installation and practically no maintenance saves time, money and labor.
- Economical alternative to expensive stainless steel doors.
- A much longer life cycle meaning fewer shower curtain replacements – saving you time and money.
- Extruded, anodized aluminum backspine with stainless steel upper and lower hinges.
- The Chase Gate Door is lightweight and virtually indestructible.
- Gate door panel is easy to clean and eliminates the concern of mold, mildew and the passage of contagious diseases common with shower curtains.

Colors Available for SRP Shower Gate Door

Color shown may differ from actual color. Consult factory for exact color match.

Since 1932, Chase Doors has been the leading manufacturer of custom, high impact traffic doors for tough commercial, industrial, and retail applications. With over 200 employees and two vertically integrated manufacturing facilities, Chase has earned a reputation for high quality products that are reliable, durable, at the best prices, and the shortest available delivery times.
