Roll-Up & Sliding Doors

Chase DuraShield® Roll-Up & Sliding Doors

Founded in 1932, Chase Doors has become the global leader and most recognized manufacturer of high-quality, made-to-order specialty door systems. Chase Doors offers a complete line of bug, bird, wire mesh and vinyl roll-up and sliding doors designed for easy installation and operation. No matter what DuraShield model you choose, Chase Doors' manufacturing capabilities and exceptional customer service has empowered Chase Doors to earn a reputation for high quality products that are reliable, durable and competitively priced.

DuraShield Doors - A Simple Solution

DuraShield Doors are a simple solution to reduce unwanted infiltration, add comfort to your employee's work environment, increase productivity and discourage trespassing. DuraShield doors can be installed on the exterior or interior of the building in conjunction with another door. They can be mounted face of wall, in jamb, inside standoff, or with our casing mounted option. The DuraShield bug, bird and wire mesh door is a cost effective way to provide ventilation and natural sunlight to buildings while maintaining an insect and bird free environment and a barrier from unwanted pedestrian traffic flow. The DuraShield solid vinyl door is an affordable choice when ventilation is not as much of a concern as sealing out dust, pollution and contaminants, noise and separating temperature differential between areas.

DuraShield Roll-Up Doors

DuraShield roll-up doors use a heavy duty extruded aluminum vertical channel guide track system to tightly secure the panel in the opening. The top of the track has a slight angle to provide smooth and consistent operation. Curtain material is used on in-jamb and inside standoff configurations to completely enclose the header and sides. All roll-up panels come standard with 3/4" fiberglass stiffeners in bright yellow vinyl pockets, optional color pockets are available. In high wind load applications an optional 1" diameter metal tube is available. The bottom pocket uses the same bright yellow, vinyl coated nylon and a hem chain. When required, an optional exterior wall mount protective hood is available.

Manual doors are available with a chain hoist or springload system. Smaller and low cycle doors can be equipped with an in-tube motor. Large doors, and applications with higher usage can be equipped with a heavy duty, 1/2 HP operator. Single and three phase voltage models are available.

DuraShield Sliding Doors

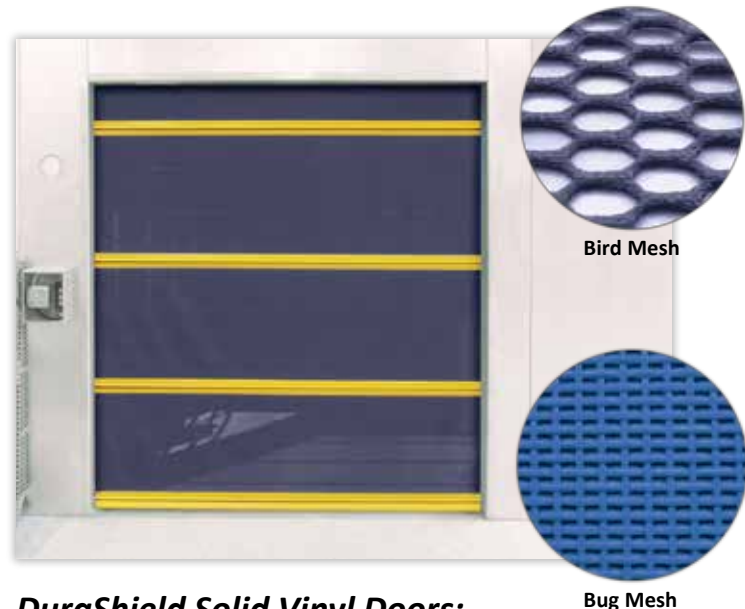

DuraShield sliding doors are available in bug, bird and solid vinyl materials and feature a 16 gauge galvanized track and 1" nylon rollers. The track system can use either a vinyl flap or brush seals to enclose the header and sides of the door. When required, an optional exterior wall mount protective hood is available. Vertical stiffeners are constructed with 1" x 1" steel tubes. The door opens and closes easily with pull straps and mechanical closures. A positive lock is standard, cane bolts are optional.

Chase DuraShield® Roll-Up & Sliding Doors

DuraShield Bug and Bird Mesh Screen Doors:

- Allow ventilation and natural sunlight while deterring bugs, birds and unwanted personnel from entering the facility.
- Available in roll-up or sliding configurations
- Doors are constructed with a durable vinyl encapsulated woven polyester mesh that is resistant to mildew and color fading.
- The Bug Screen door mesh material utilizes 17 x 11 scrim count plain weave and 11.7 oz. per square yard in your choice of standard colors.
- The Bird mesh standard material utilizes netting, a special oval shape weave with 9 holes per square inch and 15 oz per square yard of navy blue material.
- Roll-up doors come standard with 1" wide x 4" deep channel guide track with safety yellow and black strips on the interior face of the vertical channels.
- The roll tube is 3" – 6" in diameter and is dependent upon the size of the door.

DuraShield Solid Vinyl Doors:

- DuraShield vinyl doors are a cost effective solution for sealing out dust, pollutions and contaminants; and when panel opening speed is not critical, it is an excellent low cost alternative to a high speed door.
- Available in roll-up or sliding configurations
- Doors are constructed with a 22 oz. durable vinyl that is resistant to color fading and can be washed down. An optional, heavy duty 40 oz. green vinyl is available.
- For clear visibility and maximum safety an optional vision panel is constructed with clear PVC vinyl and is the full width of one panel.
- Roll-up doors come standard with 1" wide x 4" deep channel guide track with safety yellow and black strips on the interior face of the vertical channels.
- The roll tube is 3" – 6" in diameter and is dependent upon the size of the door.

DuraShield Wire Mesh Security Doors:

- Stop trespassing, but let in natural sunlight and fresh air with the DuraShield aluminum or stainless steel wire mesh security door
- 15 gauge aluminum with a 1/2" coil wire mesh is standard, 18 gauge aluminum with 1/4" coil, 16 gauge stainless steel with 1/2" coil, or 19 gauge stainless steel with 1/4" coil is available as an option.
- Heavy duty extruded aluminum channel guide track is 1.25" wide x 6" deep with safety yellow and black strips on the interior face of the vertical channels.
- Horizontal stiffeners are constructed with 3/4" fiberglass wind load rods and are inserted into specially constructed coils for horizontal stability, visibility and increased safety.
- Lock down system with a solid bottom bar is standard.
- The roll tube is 3" – 6" in diameter and is dependent upon the size of the door.

Chase DuraSpan™ Industrial Curtain

The DuraSpan Industrial Curtains are an economical solution to dividing work space and are more versatile than building permanent walls. Whether you want to separate production areas, create smaller work areas, contain dust and contaminants or simply create a barrier for your employees' comfort and productivity, the DuraSpan Industrial Curtain is an excellent solution. DuraSpan Industrial Curtains allow you to maximize your available space and provide easy installation, retractability and mobility not available in permanent wall fixtures.

DuraSpan Industrial Curtains are made with durability in mind, constructed of reinforced flame retardant vinyl and mildew resistant thread. The flame retardant vinyl meets NFPA 701 requirements and the California Fire Marshal Standard (consult factory for fire certifications, which may vary by material type). Industrial curtains are available in 18 oz. material. The top of the curtain has a reinforced sewn hem with stainless steel grommets available in 12", 18" or 24" increments. Every industrial curtain can be customized to suit your specific need.
